

INFRASTRUCTURE REPUTATION REPORT

Blacklisted domains linked to getoutbounder.com

A GTM Auto blacklist sweep of the redirect infrastructure behind getoutbounder.com. We resolved its redirect network, checked every connected domain, and cross-checked each against active spam and reputation blacklists.

**High-risk infrastructure detected**

13 of 15 domains in this network are currently blacklisted — well past the 5-domain qualification gate. This is a small but almost entirely toxic redirect footprint.

● 13 blacklisted ● 2 clean

Blacklisted domains

13 flagged

Every domain below carries the **GTM Auto** blacklist flag. We also ran a live cross-check against the public URI/domain registries — where a domain was independently confirmed, its registry is tagged on the row.

SURBL

CHECKED

5 of 13 confirmed — all on the SURBL Abuse (spam) list.

URIBL

NOT VERIFIABLE

Registry refused queries from this scan resolver — listings could not be confirmed either way.

Spamhaus DBL

NOT VERIFIABLE

Registry refused queries from this scan resolver — listings could not be confirmed either way.

HOW THIS SCAN RAN

15

Redirect domains resolved from the seed via a single host.io lookup

15

Connected domains returned and checked — the entire network

13

Confirmed on active spam / reputation blacklists

Method: GTM Auto blacklist-only scan. One host.io API call resolves the seed's redirect total and up to 50 connected domains, each then checked against the blacklist. Gates: count $\geq$ 10 redirects, blacklist $\geq$ 5 flagged domains — amplixity.com cleared both. Served from cache; no new API spend. host.io returned all 15 redirect domains, so this is full network coverage — not a page-one sample.

Registry cross-check: each flagged domain was queried live against the public URI/domain blacklists.

SURBL responded and independently confirmed 5 domains on its Abuse (spam) list. **URIBL** and **Spamhaus DBL** refused queries from the scan resolver, so their listings could not be verified — an absent registry tag means "not independently confirmed," not "clean."
